

Endorsement Form for State Matching Funds to Help Develop Publicly Owned Open-Source Paper Ballot Voting Systems

The security of our elections is at risk. Proprietary voting machines from corporate vendors are extraordinarily expensive, secret, and inherently insecure. That's why we need to develop publicly owned, Open-Source Paper Ballot voting systems. They will be more secure because the software will be transparent & open to public inspection — with votes cast on paper ballots that can be audited and recounted by hand.

Assemblymember David Chiu and Senator Scott Wiener are working with the California Clean Money Campaign on a state budget proposal that will provide matching funds to a county to develop an open-source paper ballot system using a strong “copyleft” open-source license so ensure that other counties may use and modify it while keeping it permanently open source and available to the public.

Please **print** clearly so we can list your endorsement properly.
